Summary

Associate Software Engineer with 1 year of production experience building React and TypeScript applications at Firewires OneIoT, alongside backend expertise in Java, J2EE, JSP, Servlets, JDBC, SQL, and Node.js. Built and deployed end-to-end applications covering REST APIs, authentication, database design, and responsive UIs. Experienced across the full development lifecycle, from frontend implementation to backend development and database management. Uses AI-assisted development with code review and testing.

Skills

Languages: Java, Python, SQL, JavaScript, TypeScript
Frontend: HTML, CSS, React, Redux, TanStack Query, Zod, Tailwind CSS, Chart.js, Leaflet, Turf.js, React Native, JSP
Backend & Databases: Flask, REST APIs, SQLAlchemy, J2EE, Servlets, JDBC, JWT, MySQL, Node.js, Express, MongoDB, Firebase, Supabase
Tools & Deployment: Git, GitHub, Vercel, Netlify, Postman, Android Studio
AI & Productivity: AI-Assisted Development, Claude, GitHub Copilot, Codex, Code Review & Validation

Education

B.E. – Computer Science and Engineering — Dec 2020 – May 2024
Channabasaveshwara Institute of Technology — CGPA: 8.1 / 10

Pre-University College (PCMB) — Apr 2018 – Jun 2020
Sri Sapthagiri PU College — 90.16%

SSLC — Mar 2017 – Apr 2018
Nalanda High School — 78.08%

Work Experience

Associate Software Engineer · Frontend Developer — 2025 – Present
Firewires OneIoT Pvt Ltd
React · TypeScript · Redux · TanStack Query · Zod · REST APIs

- Led TypeScript migration across the React codebase — enforcing type safety on API models, Redux slices, component props, and shared utilities.
- Implemented white-labelling across the platform, enabling client-specific rebranding without codebase duplication.
- Built infinite scroll for all dropdowns and large lists; added pagination for large-scale device datasets.
- Integrated Zod schema validation on all forms, improving data integrity and reducing invalid API calls platform-wide.
- Delivered React Native water management screens with tab navigation, charts, reusable responsive components.

Projects

Jira Clone — 2026 | Link
React · TypeScript · Redux Toolkit · Tailwind · Node.js · Express · MongoDB · JWT

- Built full-stack Jira-like app with drag-&-drop Kanban boards, issue tracking, sprint management, and role-based access
- Developed a React, Redux Toolkit, TypeScript, and Tailwind frontend with a Node.js, Express REST API, JWT authentication, and MongoDB Atlas.
- Deployed frontend on Vercel and backend on Render with environment-based configuration.

Crickdle — 2026 | Link
React · TypeScript · Firebase · Supabase · Custom REST API · Vercel · React Native

- Designed and built a Wordle-inspired cricket player guessing game, authoring a custom REST API to serve player data backed by Firebase and Supabase.
- Implemented full game logic — daily puzzle rotation, attribute comparison, guess validation — in React with TypeScript; extended to React Native and deployed live on Vercel.

ChronoEvents – Event Management System — 2025 | Link
Java · J2EE · JSP · Servlets · MySQL · JDBC

- Developed an event management platform featuring user registration, authentication, event creation, participation tracking, and administrative controls.
- Implemented role-based access control, session handling, and dynamic JSP views backed by Java Servlets.
- Designed relational database schemas and optimized SQL queries using JDBC & MySQL for event and user management.

Certifications & Achievements

Data Structures and Algorithms using Java | NPTEL — 2022
Web Development | Udemy — 2023
State Level Hackathon | CIT — 2023
Java Full Stack Course | Pentagon Space — 2024
